Product Information

Thermal transfer film with a silver metallic upper surface. Suitable for bright and dark textiles.

POLI-FLEX 4665 is compatible with all current printers using ECO-solvent and SOLVENT inks. The non adhesive PET-film liner allows even filigree motifs to be cut by all current CAD/CAM plotters after printing.

We recommend POLI-TACK 853 or POLI-TACK 854 for the application process.

After the heat transfer a brilliant glossy finish with high resolution is achieved. The transfer film is pleasantly soft and can be easily cut and weeded.

The transfer film is used for motifs and logos on sport, leisure and work wear.

Nylon and textiles with a hydrophobic impregnation are not suitable for heat transfer.

We recommend evaluation on test material.

Due to the various influences which occur from production and transfer of plotter letterings, consistency of the carrier materials and also washing and cleaning conditions, product liability can only cover the unprocessed material.

Standard Dimensions

- 500 mm x 25 m
- 1,000 mm x 25 m
- 1,524 mm x 25 m

Technical Data

Transfer Film: Polyurethane, silver metallic
Adhesive: Polyurethane-hotmelt
Thickness [mm]: 0.10 +/- 5 %
Liner: PET-film, non adhesive

Transfer Conditions

Temperature: 165° C
Pressure: 3,5 bar [medium pressure]
Time: 17 – 20 sec.

Wash Resistance / Printing

Wash resistance: 60° C
Only colour or mild detergent.
Wash textiles inside out. Tumble dryable.

Printing: True sided

SafetyDatasheet

MSDS have not been prepared for these products, they are not subject to the MSDS requirements of the Occupational Safety and Health Administrations Hazard Communication Standard, 29 C.F.R.1910.1200 (b)(6)(v).

When used under reasonable conditions and in accordance with the Poli-Tape directions for use, these products do not present a health and safety hazard. However, use or processing of the products in a manner which is not in accordance with the directions for use may affect their performance and present potential health and safety hazards.
