IP 2706

This promotional perforated window film has been specifically designed for printing with all solvent and UV inks. IP 2706 can be used on flat surfaces and is intended for indoor and short-term outdoor applications. When printed the film offers two different views: the front side with the graphic, the reverse side with a clear view through the perforations. Do not wet apply. To obtain a good through vision and protection against moisture and abrasion, we recommend overlaminating. Laminate: IP 2830-100.
