Dear Customer,

We are pleased to confirm that all of our product(s), with the exception of the products listed on page 2, are fully compliant with the REACh Regulations (EC) No. 1907/2006. This statement was last confirmed on the 11th July 2016.

Evaluation is based on the basic and auxiliary materials used in the formulation of current products. This statement refers to the current condition of the products when leaving the respective Spandex subsidiary. We reserve the right to modify the formulation of our products at any time and we would recommend, therefore, that inquiries should be repeated on an annual basis to ensure up-to-date information.

This product information is based on our current knowledge and experience. It cannot be excluded that minute traces of foreign substances could be introduced through technologically unavoidable contaminations of individual raw material components. We do not routinely analyze our products for the presence of such substances. We cannot accept any warranty or liability for factors beyond our knowledge and control.

**Spandex and the REACh Regulation**

The REACh Regulation (EC) No 1907/2006 went into force on June 1, 2007. What does REACh actually mean? The abbreviation REACh stands for Registration, Evaluation and Authorization of Chemicals. Manufacturers and importers of chemicals in quantities of 1 ton or more per year (per substance) are required to have them registered with the new Helsinki-based European Chemicals Agency (ECHA). For this purpose, a dossier has to be submitted, providing information on the hazardous level of the substance, together with its applications and measures to allow for safe use. That means that all our manufacturers within the EC, or importers into the EC, are required to have their chemical substances registered if they are considered to be falling under this qualification. At Spandex, we are committed to comprehensively and fully complying with all pertinent regulations to the best of our knowledge and belief.

The European Chemicals Agency publishes an updated list of so-called “Substances of Very High Concern” (SVHC) at regular intervals.

The Spandex team maintains continuous contact with its suppliers on issues relating to REACh conformity and to the updating of material safety data sheets (MSDS).

Best regards,

Spandex Category Management
REACH statement - ImagePerfect™ Digital and ImagePerfect™ Signage

Products which are not compliant with REACh Regulations (EC) No. 1907/2006:

- ImagePerfect™ 2305 Polyester Banner
- ImagePerfect™ 2306 Plus Canvas Banner
