Product Information

POLI-FLEX PEARL GLITTER is a thermally transferable flex-film, laminated with mineral glitter particles. Due to a surface finish with a transparent bonding effect, the glitter-films are protected against mechanical abrasion and offer resistance to washing. POLI-FLEX PEARL GLITTER is suitable to transfer onto textiles like cotton, mixtures of polyester/cotton and polyester/acrylic. POLI-FLEX can be used for lettering on T-shirts, sport & leisure wear, sport bags and promotional articles.

POLI-FLEX PEARL GLITTER can be cut with all current plotters. We recommend using a standard 45° knife. After weeding the cut flex film is transferred by heat press. The PET liner should be removed warm. Afterwards we recommend pressing the material for another 2 sec. with the same parameters.

Nylon and textiles with hydrophobic impregnation are not suitable for heat transfer. In this case we recommend using POLI-FLEX NYLON.

POLI-FLEX PEARL GLITTER is covered with a self-adhesive PET liner, enabling a reposition.

Guarantee for a secure and long-lasting bond of POLI-FLEX GLITTER is only given when following the specified temperature and pressure conditions.

We recommend evaluation on test material.

Due to the various influences which occur from production and transfer of plotter letterings, consistency of the carrier materials and also washing and cleaning conditions, product liability can only cover the unprocessed material.

Technical Data

Transfer Film: Effect Film, laminated with mineral glitter particles
Adhesive: Copolyester-hotmelt
Thickness [mm]: 0,35 +/- 10 %
Liner: PET-film, self-adhesive

Transfer Conditions

Temperature: 150° - 160° C
Pressure: 3,5 bar [medium pressure]
Time: 15 – 18 sec.

Wash Resistance

Wash resistance: 60° C
Wash textile inside out. Tumble dryable.

Standard Dimensions

500 mm x 25 m
500 mm x 10 m

Safety Datasheet

MSDS have not been prepared for these products, they are not subject to the MSDS requirements of the Occupational Safety and Health Administrations Hazard Communication Standard, 29 C.F.R.1910.1200 (b)(6)(v).

When used under reasonable conditions and in accordance with the Poli-Tape directions for use, these products do not present a health and safety hazard. However, use or processing of the products in a manner which is not in accordance with the directions for use may affect their performance and present potential health and safety hazards.
